

ADULT SOCIAL CARE / SOCIAL SERVICES:

Adult Social Care / Social Services provides essential support to people in the community who have social or special needs, assisting them to obtain local services. For anyone with disabilities, and older people who may be in need, they can give support to live independently, including practical help and equipment (walking frames, hearing aids, etc) and help with personal care (getting up, washing, etc). They can provide blue badges for disabled parking, although if you have one from another country in Europe you can still use it here. People who care for older or disabled people can get practical help, support and breaks away from the person they look after.
